About

I've been working with WinForms since 2003, including the dark corners of design-time integration. I followed Microsoft through WPF and Silverlight, then decided to try Xamarin Forms for a while. Microsoft followed me this time, but eventually I found myself moving to ASP .NET Core.

I go nuts for talking about async patterns in WinForms, but also have spent a lot of time studying and practicing testable

design. I've been branching out into HTML/JS lately, and I'm always looking for something interesting to hack at.
