About

Software developer in Berlin at [Ableton](#) (a really cool place to work!), proud to hack away on our product *Live*, a music sequencer and performance tool for electronic musicians. I've been programming professionally for about 5 years, and am deeply in love with C++ which, just like the German language, provides enough obscure corners and crazy surprises to make every day a new challenge!

I also write a blog (in French), called [5h du matin](#).
