About

Technical lead / development lead focusing on building solutions for the Microsoft .NET platform, using agile practices and methodologies such as kanban, scrum, test driven development and continuous integration.

I'm currently building distributed web systems with ASP.NET MVC, and trying to learn more about DevOps-y stuff.

Almost everything I code in my spare time is geared towards open source in one way or another, either by writing my own

OSS, contributing to other OSS projects or simply learning about all the good stuff that's out there.

I'm an emacs enthusiast who enjoys playing with different
