About

I'm a software developer at a telco supporting line-of-business applications. We use a variety of technologies from ASP.NET to Perl. I've come to appreciate SQL more over time, and I now spend most of my time in the database.

If you'd like to learn SQL properly, consider [the free SQL course from Stanford](#). For more free online courses awesomeness, check out the list of courses on [Coursera](#) and [EdX](#).
