About

By the way, the g is silent.

IRL name's Ken Eaton. I'm a seasoned biomedical researcher and software developer with expert knowledge of computational biology, object-oriented programming, image processing, statistical analysis, and user interface design. I've been programming for over 30 years, having cut my teeth on

BASIC and Logo when I was 10. Also a lover of sci-fi and gaming. Huzzah!

Feel free to contact me here (fill in the blanks with g):
