About

Developer, architect, project manager, tester, and active DevOps supporter, I'm studying, observing and advising companies which have an important risk to fail their IT-related projects. I specialize in **quality** and **productivity**.

After six years of freelancing, I worked for several companies, including Tata Consultancy Services. Today, I'm a happy member of [Finaxys](#). I mostly work with Linux, Python, and Node.js, as well as the Microsoft stack.

Outside information technology, I'm interested by photography.

I'm [mostly active on SE.SE](#), and also maintain [my blog](#).
