About

Programmer/artist working on a monster javascript project for [a cable television company](#) for the past two and a half years. Meanwhile, I build magical sound experiences for iOS including [Thicket](#), Morton Subotnick's [Pitch Painter](#), and this [fun toy payed for by gum](#). I also like to make [geometric sculptures from paper](#).

Future plans include releasing my C++ audio patching engine (build on top of STK) as an open source project, creating the world's most mesmerizing musical video game, building my

own programming language, and finding a way to pay for it all.
