## About

I'm a geologist (or a geophysist, take your pick). These days I get to work on a lot of really neat geospatial and remote sensing problems.

In my free time, I like to solve interesting quantitative/scientific problems using python.

I like bad coffee, local beer, and good food. I'm not so keen on shoes.

The photo is Darlin'. We had 9 and a half great years with her (she was a rescue, so we don't know her age) and had to let her go on June 16th, 2023. She was the best and sweetest nun and I'll always dearly miss her
