About

Justin is a Senior Software Engineer with Wirecutter working on building out a REST API and client app that powers the product database. Justin relishes programming, learning more about everything and anything, teaching and dislikes the Oxford comma. He is a course author for LinkedIn Learning covering topics such as; PHP, CakePHP, Ember.js, Unit Testing and REST APIs and gives talks regularly at the local PHP Meetup. In what time is left over from all that, he backpacks on occasion and enjoys a good book.
