About

Working professionally in software for 25 years, doing everything from mobile apps, IoT devices and frontend development to architectural reviews in automotive, massively distributed petabyte-scale engineering, and secret stuff for the Swedish military and government.

Gen-X person who started on the Sinclair ZX80, loved the ZX Spectrum, moved on to Amiga, and has now a huge retrocomputing interest.

Occational blogger on atornblad.se, runner of the [z80.tech] Mastodon instance.
