About

I am a computer programmer in Santa Monica working for the book printing industry. I've done everything ranging from bioinformatics and supercomputing, to PLC programming and report writing. I enjoy solving any class of interesting problem, and not just computer based ones. I like to think of myself as a dilettante mathematician, economics, philosophizing beekeeper.

I live near the beach with my lovely wife and my 13 year old step son. She's hot and smart, he's quite dangerous. Life is reasonably good.
