## About

I returned to Microsoft in March 2016 to help make the Windows developer platform faster and more productive, help overhaul the Windows command-line via Windows Terminal, and deliver Windows Subsystem for Linux (WSL)!

Now leading a team helping modernize Windows' native app platform and drove the effort to make Windows on Arm a great platform for developers.

Huge fan of .NET and excited to be able to run C#, F#, etc.  
cross-platform and cross-devices!
