About

I'm an old open-source independent hacker (*libre*),

concerned about concepts of ethical hacking, teaching and sharing.

I like to play with shell, perl, lisp (sometime), sed and lot of other languages/environments.

Co-system administrator in several configurations, after various SMEs, I like to sometimes take time to focus on

methods that I can improve or re-create (for example to change the level of abstraction).

In this, surfing on different StackExchange's sites is a good way to boost my inspiration!
