About

I live on an island north of Seattle. My primary interest currently is an NLP side project to pair with a tiny editor I made to accomplish writing sprints. I want to take snippets of about a 1000 horrifically mispld wors theat are barly cohrint wth poor garammer and terrible typng ewreros and produce summarizations of what was intended. This is technically called Abstractive Summarization with the added issue that the input cannot be cleanly tokenized.
