About

I'm a software engineer at Google in Mountain View, California. I love programming and learning new programming languages.

Some open source projects I've been involved in:

[AppScale](#) - an open source implementation of the Google App Engine APIs. Runs App Engine apps written in Python, Java, Go, or PHP over Amazon EC2, Google Compute Engine, Eucalyptus, Xen, or KVM.

[Active Cloud DB](#) - a software-as-a-service that exposes a REST API to any of the databases that AppScale supports (e.g., HBase, Cassandra, MongoDB) or the Datastore that App Engine supports
