## About

IT Consultant and Developer. Currently working mainly on web applications, but ongoing strong interest in spatial data systems, graphics and 3D visualization of all types. Real name if you want to talk to me is Kevin Woolley, but I've been using Cruachan as a handle since helping to run the #Delphi channel on IRC back in the mid-90's (although it's not a unique moniker unfortunately - possibly because it's such a great mountain to climb).

25 years IT experience in numerous business sectors. I've acquired a large cupboard of technologies - from Cobol to Python and OS/360 to iPhone OS with considerable experience as as DBA Systems Analyst and Project Manager
