About

My name is Jason Olson and I have three passions in life: family, music, and computers. For my "day job", I work on "the next version of Windows" at a small company named Microsoft. Outside of work, I'm a musician and family man. I'm a jazz pianist local to the Seattle, WA performing with the Seattle Jazz Singers (among others). I'm also a published arranger/composer for Sound Music Publication. My life tends to be "an ongoing struggle" between my passions for music and computers. Finally, I'm trying to bring these things together!
