## About

I'm open source developer, computer scientist and author of [Real-world Functional Programming](#). A book with Jon Skeet that explains functional concepts and F# to C# developers.

I'm a partner at [fsharpWorks](#), where we offer F# and functional programming courses. Our popular [Fast Track to F#](#) teaches how to use F# in the real world - for domain modeling, concurrent and asynchronous programming and

data access and visualization. We also run private in-house courses on a wide range of topics, so get in touch if you're interested!
