About

I first started programming aged nine in Basic on a Sinclair ZX80, quickly progressing onto Z80 machine code on the ZX Spectrum. This led to the PC platform, an Amstrad 1512, where I learned various flavours of BASIC and 8086 programming, even doing some very rudimentary 3D graphics. Up until this point, everything had been self taught.

In 1988 I went to Bradford University to study for an Electronic / Software Engineering degree. This was a thin

sandwich style course over four years, the first three were split six months at university and six months on placement in industry. The first year introduced the Pascal programming language and the Unix operating system at university and C during the placement. Subsequent years concentrated on C
