About

I have a pretty good sense of quality.

I was one of the moderators of now, sadly, defunct [comp.lang.c++.moderated Usenet group](). I was awarded MVP (Microsoft [Most Valuable Professional]()) in Visual C++ for 2012. I was about the 75th recipient of the [C++ gold badge]() here on Stack Overflow.

My contributions to the C++ FAQ are numerous, but I think my main contribution is the FAQ item about *dynamic binding during initialization*, **DBDI**, ["Okay, but is there a way to]()

[simulate that behavior as if dynamic binding worked on the this object within my base class's constructor?"](). The text is Marshall Cline's, not my original proposal. But I convinced him, through a lengthy e-mail discussion, to include that item
