About

Confucius once said: "*Choose a job you love and you will never have to work a day in your life.*" I started programming as a hobby when I was still attending elementary school and one day decided to make a profession out of my hobby. I do care a lot for code quality as code should be simple, elegant, effective, efficient, and minimalist, or as Antoine de Saint-Exupery has expressed it: "*Perfection is achieved, not when there is nothing more to add, but when there is nothing left to take away.*"
