About

The first computers I programmed on were an IBM 8088 and then a Color Apple 2. I graduated in 1986 to a Mac-Plus so that I could record digital sequenced music.

> *(What's the most powerful computer in the world? The one people use.)*

... then I upgraded to dual floppy drives (Chuck Yeager Flight Simulator required it), then upgraded to a 40MB HD (all my MIDI programming demanded it), but then I was seduced by the PC-Master Race.
