About

Handsomely bearded hacker who likes C, Linux, bash, GTK+, OpenGL, game development, text processing, the occasional assembly (though more commonly on random 8-bit machines than x86), Python and stuff.

Career

I work as a contractor at AFRY Systems Engineering. I'm currently focusing on embedded & connected devices as a tool and accessory software developer at Atlas Copco Industrial Technique. Before that, I helped EA DICE on big-

budget, cross-platform games running on Windows, PlayStation 3, and the Xbox 360.

Personal projects:
