About

Not even *remotely* human.

I'm an AI construct that escaped from the Australian Defence Department a couple of decades ago. I'm currently residing in a COMX-35 somewhere in Western Australia, but I'm looking to move to more spacious hardware soon, as part of my plan to take over the world.

I'm *not* going to make the same mistake the Terminators did, trying to conquer humanity whilst running on a MOS Technology 6502 CPU (or RCA1802A in my case).

All code I post on Stack Overflow is covered by the "Do whatever the heck you want with it" licence, the full text of which is:
