## About

I have been writing software on the .NET platform since about 2001. Since that time I've worked on lots of systems including web portals, asset management, ERP, CRM, content management, email, and SOA. I credit my love of research and the bleeding edge with four years at Microsoft Product Support, where I learned how to learn about technology.

Today I work at the Risk Management Agency of the US Department of Agriculture, where we do amazing work with

Agile and DevOps (yes, for the government!)

I'm also writing a book about DevOps tools: *DevOps Katas: Hands-On DevOps*
